

Facility Engineering Services Project Profile

Project Title: Lyssy & Eckel Feed Mill Renovation

Client: Lyssy & Eckel Feeds/T-Square Millwrights

Project Location: Poth, TX

Project Description: Designed a new pellet mill system and structural tower for a new 24 ton per hour pelleting system for a multi species feed mill.

Major Design Elements: 24 ton per hour pellet mill system, interconnecting with an existing feed mill. Designed a multilevel tower supported by large diameter caissons.

Design Issues: Integration with an older feed mill, which involved extensive coordination.

Benefits: Lyssy and Eckel now have increased pelleting capacity at their feed processing facility.
